The first step in the implementation of the Concept developed in the framework of the international project Pagoste was the establishment of [Resource Centre of Vocational Education in Design Technologies](#) on the basis of the Department of Technological and Vocational Education of Ushynsky University, whose activity is implemented through the creation of an educational and production platform of partnership between higher education seekers, employers and / or service customers and teachers / masters of industrial training, where Ushynsky University acts as a coordinator. The regulations on the Resource Centre of Vocational Education in Design Technologies were approved by the Academic Council on August 3, 2021 (Minutes №2).

Due to the delay in receiving the equipment and the war in Ukraine, the work of the center is suspended

Public discussion of the projects of the educational and professional programs "Secondary education (Labor training and technologies)" and "Professional education (Design)"

On May 23, 2022, final meetings were held with stakeholders regarding the discussion of educational programs. According to the results of the meeting, the experts indicated that, in general, the content of the Educational Program meets the modern needs of educational institutions and provides students of higher education with an opportunity to master theoretical and practical courses.

Erasmus+ Programme
of the European Union

PROBLEMS OF THE CONCEPT IMPLEMENTATION:

- adjusting the content of disciplines by modules and educational requirements of the educational and professional program to the level of training 3-4 year students to the requirements of employers in the professional field;
- inability to directly participate in the production process during production (technological) internship at the manufacture under pandemic conditions and war in Ukraine
- technical problems of setting up remote work for production (technological) internship and conducting practical classes on the industry component;
- the difficulty of agreeing on the content of civil and law agreements between employers in the manufacturing sector and students of higher education institutions.
